Dear Dr

Patient name and date of birth
The SABRE Trial

The above named patient, who is registered at your practice, was admitted to *XXX Hospital* on *Date of attendance* and was recruited into the SABRE Trial.

The SABRE trial is a randomised controlled trial of nebulised 3% hypertonic saline for acute bronchiolitis in infants. It is run by the Clinical Trials Research Unit of the University of Sheffield. A summary of the trial and contact details for more information are enclosed.

Depending on the treatment allocation, your patient may have received hypertonic saline during their hospital stay. All parents/guardians involved in the study will have been given a symptom diary and questionnaire to complete by 28 days after their child's hospital admission.

You do not need to take any action in relation to your patient's participation in this trial, and their involvement in the trial should not influence the care they subsequently receive.

Please contact me, or the trial organisers at the University of Sheffield Kirsty Sprange, SABRE Trial Manager Clinical Trials Research Unit, SchARR, University of Sheffield Regent Court, 30 Regent Street, Sheffield, S1 4DA. Tel: 0114 2222969 Email: k.sprange@sheffield.ac.uk if you have any concerns about your patient's participation in this trial or if you would like any more information.

Yours sincerely

Local Lead Investigator
