

The  
University  
Of  
Sheffield.

## Programme Specification

A statement of the knowledge, understanding and skills  
that underpin a taught programme of study leading to  
an award from  
The University of Sheffield

### Programme Details

1. Programme title	Education
2. Programme code	EDUT180
3. QAA FHEQ level	7
4. Faculty	Faculty of Social Sciences
5. Department	School of Education
6. Other departments providing credit bearing modules for the programme	Not applicable
7. Accrediting Professional or Statutory Body	Not applicable
8. Date of production/revision	October 2010. Revised March 2017, Revised November 2021

Awards	Type of award	Duration
9. Final award	MA	1 year
10. Intermediate awards	PGDip	
	PGCert	

### Programme Codes

11. JACS code(s) <i>Select between one and three codes from the <a href="#">HESA website</a>.</i>	X300		
12. HECoS code(s) <i>Select between one and three codes from the <a href="#">HECoS vocabulary</a>.</i>			

## Programme Delivery

13. Mode of study	Full-time
14. Mode of delivery	face-to-face

## 15. Background to the programme and subject area

This programme enables students to undertake a one-year, full-time course designed for current and aspiring educational professionals to develop their understanding of the challenges facing the educational world of the 21<sup>st</sup> century. The programme has been designed to enable students to undertake the course of study that best suits their needs, choosing from pathways that focus on one or a mix of the following: globalising education, early childhood education, educational psychology and language and education. Students who wish to choose modules from within and across each of these pathways can do so, graduating with an MA in Education. In this way, students are able to pursue individual pathways within a broader framework which will support their needs. As the programme is aimed primarily at international students, students will be offered a support programme to meet their study skills needs.

During their study, students are encouraged to participate fully in the life of the School. The School of Education is internationally renowned for the excellence of its teaching and the high quality of its research.

Upon completion of their programme of study, candidates will have gained knowledge and skills relevant to careers in a variety of educational contexts, e.g. teaching, educational policy and educational development roles. The programmes are appropriate both for those at the start of their careers and those at mid-career who wish to enhance their professional knowledge and competencies.

## 16. Programme aims

MA Education aims to:	
<b>A1</b>	explore critically educational theory, research and policy in national and international contexts.
<b>A2</b>	provide an introduction to the dominant traditions in educational research and to examine a range of research methodologies and approaches available.
<b>A3</b>	offer an introduction to the fields of globalising education, early childhood education, psychology and education and language and education.

## 17. Programme learning outcomes

<b>Knowledge and understanding</b>		
On successful completion of the programme, students will be able to demonstrate knowledge and understanding of:		
		<b>Links to Aim(s)</b>
<b>K1</b>	Knowledge of a range of key research relevant in different areas of educational theory, policy and practice.	A1
<b>K2</b>	Critical evaluation of theoretical perspectives of learning, teaching and pedagogy in education.	A2

<b>K3</b>	An understanding of educational issues relating to a specific area of study.	A1
<b>K4</b>	A critical understanding of the range of approaches in educational research, the different methodologies and approaches available.	A3
<b>K5</b>	An understanding of additional educational issues relating to specific areas of educational theory, policy and practice.	A2
<b>K6</b>	Critical awareness of the broad global contexts in which education is situated.	A2
<b>K7</b>	Advanced knowledge and understanding in specific areas of educational theory, policy and practice.	A1-A3
<b>Skills and other attributes</b>		
On successful completion of the programme, students will be able to:		
<b>S1</b>	An ability to produce written work which demonstrates an ability to synthesise research and practice, review relevant literature and develop a coherent and sustained argument.	
<b>S2</b>	An ability to communicate ideas orally (both individually and as part of a group) in a coherent way, and present them clearly.	
<b>S3</b>	The skills required to review and critically appraise literature, synthesise research and practice and develop a coherent and sustained argument.	
<b>S4</b>	The skills required to critically analyse and reflect upon complex subject matter, issues or questions relating to education.	
<b>S5</b>	The ability to carry out an independent, sustained research study to an appropriate standard (which involves the skills of research design, choosing appropriate methods, data analysis and writing a research report).	

## 18. Learning and teaching methods

The programme's teaching is research-led. Research-led teaching is fostered through scholarly activity of staff, appropriate use of research in the relevant fields and the development of students' own research skills. Students are encouraged to develop as active and independent learners, and teaching and learning activities have been developed which are appropriate to these aims.

The following teaching and learning methods are used:

**Lectures:** Used to develop students' engagement with key information, develop subject-specific knowledge and understanding, cognitive and analytical skills and stimulate critical reflection.

**Seminars (Staff- and student-led):** Used to develop students' subject-specific knowledge and understanding, cognitive and analytical skills and a range of key transferable skills. Generally contain activities which promote discussion and reflection.

**Student presentations:** Used to develop a range of key transferable skills. To develop other students' engagement with key information and subject-specific knowledge and understanding.

**Tutorials:** Used to respond to students' enquiries and provide feedback on coursework. To promote further reflection and analysis through discussion and questioning. To develop students' ability to reason effectively and communicate arguments and points of view clearly.

**Independent study:** The programme's online learning environment (Blackboard) comprises a bespoke range of learning materials which have been developed to facilitate and guide independent study. These materials include online reading materials, multimedia resources, links to the School of Education's study skills site. TUoS online library resources are a key learning resource, with key links embedded into the module Blackboard sites.

## 19. Assessment and feedback methods

All learning outcomes are assessed by a written assignment with the exception of Module 1 (EDU6356) which has both a written and oral presentation element. The independent study is assessed via a dissertation.

## 20. Programme structure and student development

### Programme structure

There are four taught modules for the course, two of which are studied October to December, and two from January to March. From May onwards students work on their independent study, which is submitted in September. The four modules each involve ten two-hour sessions. The students can exit with a Postgraduate Certificate or Diploma if they do not wish to complete the Masters' Programme. Students who pass all four taught modules progress to the masters' dissertation module.

Each module is assessed by a written assignment with the exception of Module 1 (EDU6356) which has both a written and oral presentation element. The independent study is assessed via a dissertation.

In addition to the taught modules, a range of support which is non-assessed is offered, for example in academic study skills, avoiding unfair means and dissertation preparation. This takes place throughout the year, alongside all of the modules. The aim of the support is to ensure that all students are suitably supported throughout their period of study. The objective is to ensure that students achieve the skills necessary to write competently and reflectively and at Masters' level. It is intended that students will develop their research skills within an enquiry-based learning framework.

### Student development

The Sheffield Masters graduate attributes are embedded throughout the programme. Specialist knowledge and skills relevant to the broad field of education and the more specific fields, dependent on module choice, of psychology and education, early childhood education, globalising education and language and education are developed and assessed through modules 1-4 and the dissertation. The overarching framework of the full time Masters' is informed by a programme level approach in which each module is planned in relation to its contribution and connection to the whole programme. This enables students to develop breadth of skills and depth of knowledge as they progress through the programme.

The students' subject specific knowledge and understanding is developed in relation to the focus of each module and is supported through the overarching framework of the full time Masters' in Education. Students are supported in the development of skills, knowledge and understanding through reading and group work. The progression built into the programme with regard to the development of critical awareness, ability to synthesise research and write critically is reflected during the taught modules and is reinforced through the non-assessed postgraduate support available. The development of key skills runs throughout the programme and students are taught critical reading and writing skills, including literature reviews and are supported in the development of appropriate academic conventions. Critical selection, evaluation and engagement with academic literature is emphasised from the onset and developed through the programme. This culminates in the dissertation when students will work independently, supported by individual dissertation supervisors.

Detailed information about the structure of programmes, regulations concerning assessment and progression and descriptions of individual modules are published in the University Calendar available online at <http://www.sheffield.ac.uk/calendar/>.

## 21. Criteria for admission to the programme

Detailed information regarding admission to programmes is available from the University's On-Line Prospectus at <http://www.shef.ac.uk/courses/>.

Applicants for the MA in Education should have a good undergraduate degree in a related field. For students whose first language is not English, the School of Education requires an IELTS score of 6.5 with a minimum of 6.0 in each component, or equivalent.
