

Programme Specification

A statement of the knowledge, understanding and skills that underpin a taught programme of study leading to an award from The University of Sheffield

*This programme specification covers the curriculum in **Philosophy** for the following dual honours degree programmes and should be read in conjunction with the relevant programme specification for the second subject.*

1. Programme Titles	2. Programme Codes	3. JACS Codes
Biblical Studies and Philosophy	BIBU06	V641
Economics and Philosophy	ECNU07	L100
Linguistics and Philosophy	ELLU09	Q100
French and Philosophy	FREU10	R100
German and Philosophy	GERU09	R200
History and Philosophy	HSTU07	V100
English and Philosophy	LITU05	Q300
Music and Philosophy	MUSU03	W300
Philosophy and Hispanic Studies	PHIU02	V500
Physics and Philosophy	PHYU14	F300
Astronomy and Philosophy	PHYU17	FV55
Politics and Philosophy	POLU04	L200
Philosophy and Psychology	PSYU05	CV85
Russian and Philosophy	RUSU14	R700
Mathematics and Philosophy	MASU25	G100
4	Level of Study	Undergraduate
5a	Final Qualification	Bachelor of Arts with Honours (or Bachelor of Science with Honours for PHYU17, PHYU14 and MASU25)
5b	QAA FHEQ Level	Honours
6	Intermediate Qualifications	None
7	Teaching Institution (if not Sheffield)	Not applicable
8	Faculty	Arts and Humanities (except ECNU07, POLU04, PSYU05 which are offered via the Faculty of Social Science and PHYU17, MASU25 and PHYU14 which are offered via the Faculty of Science)
9	Co-ordinating Department	Philosophy is the co-ordinating department for PHIU02. The partner department is the home department with all other duals.
10	Other Departments involved in teaching the subject	None
11	Mode of Attendance	Full-time
12	Duration of the Programme	Three years (except FREU10, GERU09, RUSU14 and PHIU02, which last four years including a placement year abroad between Levels 2 and 3)
13	Accrediting Professional or Statutory Body	None
14	Date of production/revision	March 2003, updated February 2009

Dual Degrees

The University of Sheffield defines a dual degree as the independent study of two parallel subjects. Dual degrees offer students the flexibility to choose a programme of study that reflects their interests and gives the opportunity to develop detailed knowledge and key skills in two major subjects. Whilst the two subjects may be taught independently, they will complement, inform and illuminate one another. Where there are two programme specifications for dual degrees, one for each half of the programme, and students should refer to both documents for a full description of the whole programme. Where there are clear links between the two subjects, details will be included in Sections 15 and 20 of the programme specifications. However, there are some single programme specifications for dual degree combinations where there is a substantial degree of integration between the two subjects.

15. Background to the programmes and subject area

Philosophy seeks to understand, and to question, ideas concerning the nature of reality, value and experience that play a pervasive role in understanding the world and ourselves. Some problematic concepts, such as existence, reason and truth, occur in every sphere of human enquiry. Others belong to particular areas of thought and practice, such as art and politics. Philosophy has been practised for thousands of years, and in many different cultures, giving rise to a diversity of traditions.

Philosophy at Sheffield concentrates on the Western philosophical tradition, which is itself diverse and open-ended, stretching back for over 2,500 years and still developing in many different directions. Teaching is informed by the research activities of the staff, particularly at Level 3. Sheffield was awarded the grade of 5A in the 2001 national Research Assessment Exercise and the top mark of 24 in the QAA Subject Review of 2000.

Dual degrees offered by the Department of Philosophy take the form of 'parallel' programmes with approximately half the total credit taken in each subject. The two subjects are taught independently, but the combination allows the two to complement and illuminate each other. The Department has particular research specialisms in metaphysics and epistemology, philosophy of psychology and language, ethics and political philosophy, American Pragmatism and German philosophy. This specialist knowledge informs and enriches the Department's teaching of Dual degrees with politics, psychology, history, economics and some of the sciences and languages.

Study of philosophy develops skills of comprehension, analysis and communication, which are an excellent training for a very wide range of careers. When philosophy is combined with other humanities, science and social science subjects, it provides students with a set of skills which are especially attractive to employers. Recent Sheffield philosophy graduates have gone on to employment in various forms of management in the manufacturing and service industries, as well to posts in the civil service, teaching and in computing; and also to various forms of further training, such as the law and postgraduate work in philosophy and other disciplines.

Further information is available on the Department's web site: www.shef.ac.uk/philosophy/

16. Programme aims

1. Equip students with an understanding of a range of philosophers and philosophical problems, while encouraging as deep a critical engagement with those philosophers and problems as is feasible in the time available.
2. Promote respect for the norms of – clarity; careful analysis; critical reflection; rational argument; sympathetic interpretation and understanding; and impartial pursuit of truth.
3. Promote independence of thought and a critical and analytical approach, not only to theories and concepts, but to the assumptions on which they are based.
4. Equip students with the core skills involved in – careful reading, comprehension and compression of textual material; clear thinking; sound argumentation; and the clear and well-organised expression of ideas.
5. Provide high quality teaching which is informed and invigorated by the research activities of members of staff.
6. Facilitate an awareness of the application of philosophical thought to other academic disciplines or to matters of public interest, encouraging students to apply philosophical skills more widely where appropriate.
7. Encourage students to plan for themselves the contents of their degree programmes in philosophy, and to plan and organise their own work, within the constraints and advice provided by the Department.

8. Respond to the diversity of student interests by allowing both the combination of the subject of study with subjects offered by other providers and a level of student choice within each programme of study appropriate to that programme.
9. Recruit highly qualified students, while at the same time providing access for those with non-standard qualifications who can benefit successfully from the appropriate level of degree work.

17. Subject learning outcomes

Knowledge and understanding - By the end of the programme students will have developed:	
K1	A critical awareness of some of the central distinctions and arguments in moral and political philosophy, epistemology, metaphysics, philosophy of mind and language.
K2	An in-depth knowledge and understanding of some central areas of Western analytical philosophy.
K3	Knowledge of the theories and arguments of some of the major philosophers, encountered in their own writings, and some awareness of important areas of interpretative controversy concerning those philosophers.
K4	The ability to use and understand properly specialised philosophical terminology.
K5	Understanding of some major issues currently at the forefront of philosophical debate and research.

Skills and other attributes: Intellectual Skills	
A1	Ability to read carefully and interpret philosophical texts, and to identify textually-based arguments.
A2	Ability to analyse the structure of complex and controversial problems, with an understanding of major strategies of reasoning designed to resolve such problems.
A3	Ability to abstract, analyse and assess arguments carefully, distinguishing what is relevant to the issue under discussion from what is not.
A4	Ability to recognise the strengths and weaknesses of arguments for and against a philosophical position.
A5	Ability to construct a detailed individual line of argument in support of one's own position and defend it in a clear and effective manner.

Skills and other attributes: Generic Transferable Skills	
B1	Ability to understand the structure and content of complex presentations and difficult texts.
B2	Ability to think deeply about difficult issues and to make judgements about what they believe based on available evidence and argument.
B3	Ability to communicate ideas and arguments effectively both orally and in writing.
B4	Ability to manage time effectively by working to deadlines.
B5	Ability to work autonomously to research and produce substantial pieces of writing to specified standards of content and presentation.
B6	Ability to use libraries and IT resources effectively for the purposes of searching for and acquiring relevant information.

18. Teaching, learning and assessment

Development of the learning outcomes is promoted through the following teaching and learning methods:

K1- K5: Knowledge and Understanding

Induction procedures at Level 1 include the distribution of level-specific handbooks, a Welcome Meeting and personal advisory tutorial all designed to aid module choice.

Lectures provide introductory guidance to particular bodies of academic material and to philosophical terminology, and offer guidance on how that material is to be understood, used and evaluated. Lectures are clearly linked to follow-up seminars. Having attended a lecture on a topic, students are then well equipped to do

more analytical work both in private study and in small-group discussions.

Tutorials run by graduate students at Level 1 and **seminars** run by lecturers at Levels 2 and 3 enable students to work through pieces of text or problems in detail, thereby developing their understanding of philosophical texts and problems. Tutorials and seminars may be either staff or student led and are designed to encourage discussion of the issues raised in lectures by means of relevant stimulus material.

Private Study in preparation for lectures, seminars and assessment develops students' understanding of texts and problems, and increases their knowledge base. New students are introduced to study skills through information in the student handbook and through the advice and assistance of tutors in Level 1 modules. The amount of independent study broadly expected for each module is clearly set out in the relevant departmental booklet, although it is generally recognised that this will vary from student to student. Provision exists at Level 3 for supervised independent study leading to the writing of a *Long Essay*.

A1 - A5: Intellectual Skills

Induction procedures such as the departmental booklets and a lecture given at the Welcome Meeting are designed to help students engage with their chosen modules in a critical and analytical way and produce written work which is lucid, well informed and well structured.

At all Levels, discussion both in **lectures** and to an even greater extent in **seminars** and **tutorials** facilitates the student's reading and analysis of philosophical texts and encourages them to develop their own lines of thought against a rigorous background provided by lectures and by private study of assigned reading.

At Level 3, the one-on-one **advisory essay tutorials** which are associated with each module enable lecturers and students to work together on a particular piece of student work, improving it and giving the student the opportunity to elaborate and defend their views in discussion. The lecturer reads a draft of the essay prior to the advisory tutorial and provides detailed comments on it during the session.

Staff Office Hours provide an opportunity, each week, for students to come and discuss philosophical matters one-on-one with their lecturers and students are encouraged to make use of this facility.

B1 - B6: Generic Transferable Skills

Students develop transferable skills of reading and comprehension through preparation for seminars, tutorials, advisory tutorials, essays and exams.

Seminars, tutorials and advisory tutorials enable students to strengthen their capacities to question and evaluate the material being studied and to formulate opinions. They also develop oral communication skills, both through the medium of discussion and where students are asked to give presentations in seminars.

A library induction session and the University's IT induction sessions introduce students to essential learning skills. Throughout the programme, students have the opportunity to acquire and enhance the ability to use IT and library skills for the purposes of acquiring, presenting and communicating relevant information.

Opportunities to demonstrate achievement of the learning outcomes are provided through the following assessment methods:

K1- K5: Knowledge and Understanding

Coursework essays at all Levels are used to encourage study in depth and written feedback is provided on all coursework essays. At Level 1, a 10-credit module requires one coursework essay, a 20-credit module requires two. Coursework essays account for 50% of the module mark. Feedback on these essays is of two kinds: *summative* feedback provides a mark which evaluates the essay whilst *formative* furnishes advice on how the essay might be improved. At Level 1, both summative and formative feedback is provided by the tutor who can also advise on the gestation and drafting of essays. Level 1 essays are between 1,000 and 1,500 words in length.

At Level 2, there is an end of semester coursework essay for each module which receives summative and formative feedback from the lecturer. At Level 2 there is, in addition, a mid-semester assessment for each module which takes various forms – unseen class exams, take-home exams, coursework essays – and which receives written summative and formative feedback. These two written assessments are equally weighted and together account for 50% of the module mark. All Level 2 modules are 20-credit modules and coursework essays are between 1500 and 2000 words in length.

At Level 3, students write one piece of end of semester coursework for each module which accounts for 50% of the module mark. Formative feedback, oral or written, is given on this essay in an advisory essay tutorial with the lecturer before the essay is handed in. Written summative and formative feedback is given by the lecturer on

the final submission. All Level 3 modules are 20-credit modules and at present, coursework essays are between 2500 and 4000 words in length. Students also have the chance to write a Long Essay in connection with some of their Level 3 modules, an essay which accounts for 100% of their mark for that module. The lecturer gives advice on the gestation and drafting of Long Essays in at least two one-to-one meetings and then provides feedback, both summative and formative, on the final draft. At present, Long Essays are between 4500 and 6000 words in length.

End of semester examinations are used at all Levels to encourage students to accumulate a wider knowledge base and to test their ability to use information selectively and draw together arguments concisely. Every module is assessed by means of an end of semester exam (except where a Long Essay is written at Level 3) and this examination accounts for 50% of the module mark. 10-credit modules are assessed by means of a one-hour examination (at Level 1) and 20-credit modules by means of a two-hour examination. Questions may be released before the examination, allowing the student to prepare answers in advance and thereby testing their depth of knowledge and ability to organise material in a concise form. Alternatively examinations may be unseen, testing student's ability to deploy relevant information effectively under strict time constraints and in response to questions which are not pre-released.

A1 - A5: Intellectual Skills

As the student moves through the programme, the coursework essays required of them become progressively longer and more detailed, testing their depth of knowledge, their grasp of detail and their ability to assimilate and organise progressively larger amounts of material. The feedback provided also becomes more intensive, culminating in the advisory essay tutorials at Level 3 which give students an opportunity to defend their views and respond to criticism in a pertinent and open minded way. The end of semester examinations become more probing at successive Levels, requiring the deployment of increasingly sophisticated material, the marshalling of more complex forms of argumentation and increasing care in making distinctions, eliminating irrelevance and in analysing the content of relevant texts.

B1 - B6: Generic Transferable Skills

Skills of self-motivation, organisation and self-discipline are tested in different ways by coursework essays, long essays and examinations. These modes of assessment also constitute an indirect test of a student's ability to use library resources and IT. Research and presentation skills are also developed by two of the Level 1 approved modules. Feedback on essays will comment on student's written communication skills. Although student presentations are not always explicitly assessed, informal feedback is provided.

19. Reference points

The learning outcomes have been developed to reflect the following points of reference:

Subject Benchmark Statements

<http://www.qaa.ac.uk/AssuringStandardsAndQuality/subject-guidance/Pages/Subject-benchmark-statements.aspx>

Framework for Higher Education Qualifications (2008)

<http://www.qaa.ac.uk/Publications/InformationAndGuidance/Pages/The-framework-for-higher-education-qualifications-in-England-Wales-and-Northern-Ireland.aspx>

University Strategic Plan

Learning and Teaching Strategy (2011-16)

<http://www.shef.ac.uk/lets/staff/lts>

The research interests of departmental staff and the research strategy of the Department of Philosophy;

20. Programme structures and regulations

The programme structure in relation to the philosophy component of the dual degrees is clearly differentiated into modules at three different Levels, a structure which ensures a clear progression with increasing demands on the learner in terms of intellectual challenge, skills, knowledge, conceptualisation and learning autonomy. Some modules are flagged as being recommended prerequisites for others, helping students to plan a coherent programme of study but there are no compulsory or core modules: students can choose freely from a range of modules. Personal tutors are available to offer advice and guidance on module choice. There is also the possibility of doing modules at different Levels - students in Year Three, say, can take a certain number of credits at Level 2 - though the number is limited.

The philosophy curriculum thus combines a flexibility which enables students to pursue their own individual interests with a definite sense of intellectual progression and cumulative achievement. Only marks obtained at Levels 2 and 3 count towards the student's final degree classification. The student's final degree classification is determined by the method used in the co-ordinating department for the degree.

<http://www.shef.ac.uk/content/1/c6/08/39/70/LeTS%20guidance-new%20methodology.pdf>

The teaching provision at each Level is tailored to the demands of that Level. At Level 1, lectures are supplemented by tutorials run by graduate students which enable students to clarify and discuss points raised in the lectures. At Level 2, lectures are supplemented by seminars run by the lecturer. Like Level 1 tutorials, these seminars aim at the clarification and discussion of points raised in the lectures but they encourage a deeper treatment of the issues with more challenging stimulus material. At Level 3, modules are designed to mesh with the research interests of the lecturer, providing students with the opportunity to engage with developments at the frontiers of the discipline.

Detailed information about the structure of programmes, regulations concerning assessment and progression and descriptions of individual modules are published in the University Calendar available on-line at

<http://www.shef.ac.uk/govern/>.

21. Student development over the course of study in the subject

Modules at **Level 1** are intended to develop the ability

- to think through and communicate points cogently and analytically in the form of tutorial discussion, the academic essay and the timed examination;
- to read philosophical texts carefully and analytically;
- to present written work professionally;
- to appreciate and deploy some of the central distinctions and arguments in several of the following: theory of knowledge, philosophy of science, philosophy of mind, philosophy of religion, moral and political philosophy.

Modules at **Level 2** are intended to develop

- a deeper knowledge and understanding of the areas of Western philosophy covered in Level 1;
- an ability to follow and critically evaluate contemporary debates in philosophy;
- increasing sophistication in the reading of philosophical texts and in the communication of philosophical ideas and arguments;
- increased ability to think through intellectual problems independently.

Modules at **Level 3** are intended to develop the ability

- to critically evaluate some of the most challenging areas of Western philosophy;
- to construct one's own line of argument as part of the solution to difficult intellectual problems;
- to appreciate the limits of knowledge and the preconditions for its acquisition;
- to exercise an extensive range of subject-specific and generic transferable skills.

22. Criteria for admission to the programme

Detailed information regarding admission to the programme is available at <http://www.shef.ac.uk/prospective/>

23. Additional information

For further information students are directed to the Departmental web pages at www.shef.ac.uk/philosophy. These contain full information on courses and provide access to student handbooks.

This specification represents a concise statement about the main features of the programme and should be considered alongside other sources of information provided by the teaching department(s) and the University. In addition to programme specific information, further information about studying at The University of Sheffield can be accessed via our Student Services web site at <http://www.shef.ac.uk/ssid/>
