A UNIVERSITY FOR SHEFFIELD

THE PROPOSED UNIVERSITY BUILDING.

You should support the University because:

1. The UNIVERSITY will be for the people.
2. The UNIVERSITY will bring the highest education within the reach of the child of the working man.
3. The UNIVERSITY will help the local industries.
4. The UNIVERSITY will be the centre where the treatment of accidents and diseases will be studied.
5. SHEFFIELD is the only large City in England without a University. Sheffield cannot afford to remain in this position.
6. The UNIVERSITY will not only benefit this district, it will assist the nation in its trade competition with other nations.

Ask at your works or shop for a copy of the Pamphlet on the University Movement.

This is the original fundraising poster from 1904/1905 which helped raise donations for the University of Sheffield.

Over £50,000 (worth more than £15 million today) was donated by steelworkers, coal miners, factory workers and the people of Sheffield in penny donations to help found the University.

A century on, the University is now rated as one of the top world universities – according to the Shanghai Jiao Tong Academic Ranking of World Universities.

The University of Sheffield

Your graduation day is a special day for you and your family, a day for celebrating your achievements and looking forward to a bright future. As a graduate of the University of Sheffield you have every reason to be proud. You are joining a long tradition of excellence stretching back more than 100 years.

The University of Sheffield was founded with the amalgamation of the School of Medicine, Sheffield Technical School and Firth College. In 1905, we received a Royal Charter and Firth Court was officially opened by King Edward VII and Queen Alexandra. At that time, there were 363 students reading for degrees in arts, pure science, medicine and applied science. By the time of our centenary, there were over 25,000 students from more than 100 countries, across 70 academic departments.

The first ever graduate of the University was its first Chancellor, the 15th Duke of Norfolk, who was awarded an Honorary Degree in 1908 prior to the first ever graduation ceremony. This graduation ceremony took place in the historic setting of Firth Hall on 2 July 1908 at 5 pm - three years after the University had been opened by King Edward VII. At this inaugural ceremony, 81 graduates were present, 10 of whom were female. There were also 4 honorary graduates.

The first female student to cross the stage was Winifred Parker with the first male student being William Watson. The first international student to graduate on this day was Zung Tse Kien Woo from China.

Zung Tse Kien Woo

Today, a degree from Sheffield is recognised all over the world as a hallmark of academic excellence. We are proud of our graduates and we are confident that you will make a difference wherever you choose to build your future.

With every generation of graduates, our university goes from strength to strength.

Welcome from the President and Vice-Chancellor

Today is a very special occasion as we celebrate your graduation. At the University, we are deeply proud of your achievements - particularly after such a challenging year for everyone.

However, this is not goodbye. Now that you have graduated, you join a worldwide community of more than 300,000 alumni who continue to be an important part of our University. We hope that you will keep in touch with us, and with each other, in the years to come.

I also hope that you will be able to join us in Sheffield next year for your rescheduled graduation ceremonies, where we can celebrate your achievements in the traditional way.

In the meantime, I wish you every success for the future.

Professor Koen Lamberts
President and Vice-Chancellor

Reasons to be Proud

Graduation is a time to recognise and celebrate achievement and success, and every graduate has a story to tell of effort and attainment.

You should feel proud you are graduating from a world-leading university that is helping address some of the most urgent challenges facing society today.

That's why some of the world's most talented, ambitious staff and students come here, finding a place they can challenge accepted wisdom, push boundaries and break the mould.

TO WORK FOR
2018

**Russell
Group**

As a place to live and study, Sheffield is impossible to beat.

We believe that's because we are building something very special here in the city we call home - academic excellence and the very best student experience.

Covid-19

Since the start of the Covid-19 pandemic, staff and students from across the University have been working to mitigate its effects on society with a rapid response through crucial research, innovation and collaborations. Some of the ways the University has helped include;

- Our engineers have used their world-leading manufacturing expertise to help provide vital equipment to the NHS.
- Our experts in genomics are helping the world get a better understanding of Covid-19, including being one of the first teams in the UK to publish sequenced genomes of the Covid-19 virus.
- Our researchers are leading investigations into how the pandemic is affecting people throughout society and are helping to optimise how patients with Covid-19 are assessed and treated by the emergency care system.
- Our scientists are helping to boost the security of supply chains, food and energy systems both in the UK and around the world.
- Our researchers from the arts and humanities are helping the UK's arts and culture sector reopen and recover from the pandemic.
- Our social scientists are helping to address some of the UK's biggest environmental, political and social issues, such as ageing, the climate crisis, education, housing and social care.
- Our medicine students are providing voluntary support to frontline doctors, nurses and healthcare workers.
- Our new nursing apprentices are making a major contribution to the fight against Covid-19 on the NHS frontline after graduating from the University.

Aside from the pandemic, here are some of the ways the University is making a positive impact on the world;

Pioneered

- Our new gene therapy innovation centre is set to advance scientific discoveries into promising treatment options for millions of patients with life-threatening diseases. The Sheffield Gene Therapy Innovation and Manufacturing Centre (GTIMC) will be one of three cutting-edge hubs in the UK dedicated to advancing the clinical development of new genetic treatments for a number of diseases that currently have no cures.
- Research from our Medical School has helped to develop a new medical device that improves the prediction of preterm birth at a fraction of the cost of current methods. The device will help to reduce the global number of deaths and long-term complications caused by babies born prematurely.
- Our scientists have developed a new approach to creating drugs to treat Alzheimer's disease which has identified two potential new therapies. The drug leads are able to target the three pillars that cause Alzheimer's and improve on previous approaches to developing new treatments for the debilitating disease.
- Our historians and scientists have collaborated to revive and grow extinct varieties of rice as part of a project to revive recipes and flavours that were once loved but have since been lost. The project is developing rice that can thrive in an increasingly extreme modern climate.
- A new, more sustainable way to make zinc oxide - a key ingredient in many high end health and beauty products such as sunscreens - has been developed by our chemical engineers. The method is being commercialised to create sunscreens that are much better for the environment and don't damage fragile corals and marine ecosystems.

- Our Advanced Manufacturing Research Centre (AMRC) and Nuclear Advanced Manufacturing Research Centre (Nuclear AMRC) are supporting a major new project to decarbonise the industrial cluster around the Humber and help UK manufacturers win work in emerging low-carbon sectors including hydrogen fuels and carbon capture.

Recognised

- The University has been ranked among the top 100 universities in the world in the QS World University Rankings 2022, reaffirming our position as a leading global university for teaching and research excellence.
- The University is in the top 10 per cent of universities in England for working with businesses to find solutions to problems in industry and society, according to a new framework. The first-ever Knowledge Exchange Framework, published by Research England, shows the rich contributions that universities such as Sheffield make, both economically and socially, on local and national levels.

Honoured

- Dr Thushan de Silva from our Department of Infection, Immunity and Cardiovascular Disease has been awarded an MBE for his Covid-19 research. Dr de Silva and his team have made a major contribution to the global effort to track virus mutations and characterise immunity to SARS-CoV-2.
- Professor Julie Gray from the University's Department of Molecular Biology and Biotechnology has been elected as a member of European Molecular Biology Organization (EMBO). The EMBO is an international organisation that promotes excellence in the life sciences around the world. Professor Gray's research is helping to tackle global food security risks.
- Professor Tim O'Farrell from our Department of Electronic and Electrical Engineering has been selected to join the new Climate & Environmental Working Group. The group will feed into government policy on the environmental impact of 5G technology.

Invested

- The University has launched a £3 million Covid-19 Support Fund for any of our students who are facing additional costs or a significant reduction in income because of the Covid-19 pandemic.
- We've pledged to reach net-zero carbon emissions on campus by 2030 and across all of our activities by 2038. The commitments are set out in the University's five year sustainability strategy, which has been informed by academic research, the Intergovernmental Panel on Climate Change's (IPCC) call for comprehensive climate action and the Tyndall Centre's 2019 report, 'Setting Climate Commitments for the City of Sheffield'.
- The University has been given £5.85 million - the largest single gift from an individual alumnus in its history - to launch a new student support programme and search for new therapies for a range of incurable and debilitating diseases. The record donation has been made by The Law Family Charitable Foundation (LFCF), which was established by Andrew and Zoë Law to support charitable initiatives with an emphasis on education and health. Andrew is Chairman and CEO of Caxton Associates - a global macro hedge fund - he studied Economics at Sheffield and graduated with a First Class honours degree in 1987.

- Boeing has renewed its longstanding relationship with the University of Sheffield Advanced Manufacturing Research Centre (AMRC) with an agreement that will continue two decades of innovation and collaboration for another five years. Boeing's longstanding and successful relationship with the AMRC, and its world-class research and development activities, was a major factor in its decision to build Boeing Sheffield, the company's first factory in Europe. The £40 million factory opened in 2018 close to the AMRC campus.
- Our researchers are part of a new £20 million centre that is set to play a key role in driving research and innovation to support the government's plans for a Green Industrial Revolution. The Industrial Decarbonisation Research and Innovation Centre (IDRIC) will work closely with the UK's major industrial clusters to address the challenges of industrial decarbonisation.
- Researchers from our Neuroscience Institute have been awarded £1.2 million to develop a drug to protect dopamine-producing brain cells and slow down the progression of Parkinson's Disease. Around 145,000 people are living with Parkinson's in the UK and there is a desperate need for new and better treatments.
- We've secured a new £3.5m Centre for Doctoral Training that will fund 39 new PhD studentships over six years. The centre aims to produce the next generation of scientists to improve how chemicals are monitored, assessed and managed in the environment.
- The University is part of a new regional skills partnership in the Sheffield City Region, which aims to tackle current and future skills shortages in the wake of the Covid-19 pandemic. The Regional Post-18 Education Partnership has been developed to identify positive and practical actions which can impact the most disadvantaged young people and adults in the region as they enter the post-18 system through education or work.
- We've launched a new regional business forum which will work to better understand and address the region's productivity. The forum is bringing together representatives from the Yorkshire, Humberside and North East region's key sectors; including manufacturing, digital and retail as well as from the public sector and academia.

Sheffield Alumni

Graduation Doesn't Mean Goodbye...

Wherever you're from and wherever you are in the world, when you graduate you become part of the Sheffield Alumni community – a network of over 300,000 former students who continue to stay connected to the University.

Benefits for Alumni

- Bespoke employment and career advice from the **Careers Service** for up to 3 years after graduating – including one-to-one appointments with advisors, graduate job listings, employer fairs, workshops and guides to support with job applications and interviews
- **Networking opportunities** and events in the UK and overseas, giving you chance to connect with other graduates in your sector or if you're moving to a new part of the world
- **Tailored communications** with news from the University, your old department, and clubs and societies you were part of
- Up to 20% **discount on postgraduate study fees**
- Free membership of the **University Library** for alumni with undergraduate or higher degrees, providing access to all library sites during staffed hours
- **Free online courses from the University** – from developing your CV and report writing, to an introduction to forensics, there are all sorts to take your interest
- **Discounts** for Inox Dine, local hotels and Sport Sheffield memberships

For full details please visit:

sheffield.ac.uk/alumni/benefits

Volunteer

Volunteering is a fantastic way to stay connected to the University whilst **making a huge difference** to current and prospective students. By sharing your experiences and supporting current students you can **continue your own personal development**, enhancing skills in leadership, mentoring and communication.

Opportunities include:

- Mentor a student online for a semester
- Give a talk about your career
- Write a profile on your career journey
- Feedback on student projects

To find out more please visit:

sheffield.ac.uk/alumni/volunteer

Don't Miss Out!

To receive the latest information, benefits and opportunities that interest you please keep us updated with your current contact details.

To update your details please visit:

sheffield.ac.uk/alumni/update

We'll be back in touch in the next few months with a full introduction and more about the support on offer.
